To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this fund are climate change mitigation, and sector and industry specific significant environmental and societal factors that would typically cause elevated ESG risks in the industry in question.

- **How did the sustainability indicators perform?**
- **...and compared to previous periods?**

Promotion of climate change mitigation was measured by monitoring the carbon intensity and carbon risk indicators of the fund. The indicators are based on Sustainalytics and Morningstar ESG-databases and methodologies. Carbon

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

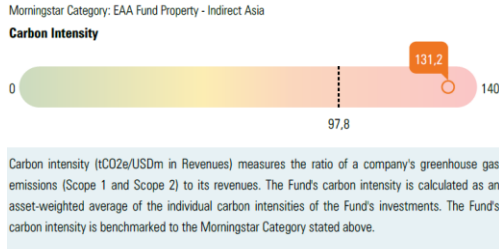

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

intensity was higher and the fund had a slightly higher exposure to carbon risk than the Morningstar category consisting of similar funds. However, during this reporting period the carbon intensity of the fund slightly decreased and the carbon risk was on a moderate to low level. The indicators developed as follows, status in Q4 2023 and previous periods:

HOLDINGS CARBON RISK DISTRIBUTION

The adequate management and prevention of potential negative impacts caused by sector and industry specific significant environmental and societal factors that would typically cause elevated ESG risks in the industry in question, was measured by monitoring the ESG risk indicators of the fund. The indicators are based on ESG-databases and methodologies of Sustainalytics and Morningstar. In assessment of the ESG-risks the indicator takes into account to what kind of ESG-risks a company is exposed to and how well it manages those risks. Significant sources of ESG-risk vary according to sector and industry. Low ESG-risks indicate that either a company's ESG-risk exposure is minor, or that it manages its risks well.

The overall ESG-risk of the fund was moderate, and the risk level was slightly higher than in the peer group Morningstar category comprised of similar funds. The ESG-risk of the fund continued to decrease in this reporting period. The indicators developed as follows, status in Q4 2023 and previous periods:

SUSTAINABILITY RATING

The Morningstar Sustainability Rating is based on relative fund comparison according to Morningstar's methodology, where Morningstar benchmarks funds according to their current and historical sustainability risk factors. The Fund's rating relative to its peer group is measured by the number of globes ranging from five (the top performing 10%) to one (the least performing 10%).

SUSTAINABILITY RISK RELATIVE TO PEER GROUP

The Sustainalytics ESG Risk Rating measures the degree to which a company's economic value is at risk due to Environmental (E), Social (S), and Governance (G) factors. The Fund's sustainability risk is calculated as an asset-weighted average and classified on a five-point numerical scale: negligible (0-10), low (10-20), medium (20-30), high (30-40), and severe (≥40).
